

Enhance the way your care team works

Improve staff opportunities to learn and apply learning

Introduce new staff to 'dementia' – what it means, how the person is affected and how staff behaviour can impact on well being

*"The number of incidents involving injury to staff members has dropped dramatically following the training in dementia care.*

*Some residents have gained weight and many have improved hydration"*

*Manager, 180 bed residential and nursing facility*

*"Staff are taking different and varied approaches on a daily basis to optimise service users well-being"*

*Manager 36 bed care home*

*"Staff interaction with residents comes across with far more confidence and there is a more constructive approach to daily activities"*

*Manager 36 bed specialist dementia care home*

A new evidence based resource to improve the quality of care for older people with dementia

# dementia care **DEVELOPMENT PACK**

- The audit and training materials help the manager and staff comply with National Minimum Standards
- The training materials are in line with the General Social Care Council guidance to support staff in their continuous professional development
- The training materials are mapped to Skills for Care Knowledge Set in Dementia Learning Outcomes:
- The audit and training materials help the manager, staff and relative of the person with dementia achieve Alzheimer's Society Person Centred Standards as described in 'Quality Dementia Care in Care Homes'
